1 INTRODUCTION

Amazon Web Services (AWS) is providing 12 months of Free Tier account to new subscribers to get hands-on experience with all the AWS cloud services. In this AWS Free Tier account, Amazon is giving no. of different services use with some of the limitations to get hands-on practice and more knowledge on AWS Cloud services as well regular business use.

The AWS Free Tier is mainly designed to give hands-on experience with AWS Cloud Services for customers on free of cost for a year.

With AWS Free Tier account all the services are offered have limits on what we can use without being charged.

This activity guide cover steps to

- How to create a new AWS Free Tier Account | Amazon Web Services
- Login to AWS Console

2 DOCUMENTATION LINKS

1. How do I create and activate a new Amazon Web Services account?
<https://aws.amazon.com/premiumsupport/knowledge-center/create-and-activate-awsaccount/>
2. AWS Free Tier Limits:
<http://docs.aws.amazon.com/awsaccountbilling/latest/aboutv2/free-tier-limits.html>
3. AWS Free Tier Terms: <https://aws.amazon.com/free/terms/>

3 REGISTER FOR AWS FREE TIRE ACCOUNT

This guide assume that you don't have **AWS Free Account** and registering for Cloud Access first time.

Note: If you already have AWS ACCOUNT then you can skip this section and go to Login to AWS Console.

1. First Open your web browser and navigate to <https://aws.amazon.com/free/>
2. On middle click on **Create a Free Account**

Types of offers

Explore more than 60 products and start building on AWS using the free tier. Three different types of free offers are available depending on the product used. See below for details on each product.

 Always free These free tier offers do not expire and are available to all AWS customers	 12 months free Enjoy these offers for 12-months following your initial sign-up date to AWS	 Trials Short-term free trial offers start from the date you activate a particular service
--	---	--

3. Provide the details which you want to use for login your **AWS** account and click on **Continue**
 - **Email address:** Enter the mail id which haven't registered yet with Amazon AWS
 - **Password:** Type your Password
 - **Confirm password:** Confirm the Password
 - **AWS Account name:** Choose a name for your account. You can change this name in your account settings after you sign up.

Explore Free Tier products with a new AWS account.

To learn more, visit aws.amazon.com/free.

Sign up for AWS

6 HOW TO DELETE/CLOSE YOUR AWS ACCOUNT

Here are the steps to delete or close your AWS account:

1. Review [Considerations before you close your AWS account](#).

2. Sign in as the root user of the account that you want to close, using the email address and password that are associated with the account. If you sign in as an AWS Identity and Access Management (IAM) user or role, you can't close an account.

The screenshot shows the AWS 'Sign in' page. The 'Root user' option is selected, with the description: 'Account owner that performs tasks requiring unrestricted access. [Learn more](#)'. The 'IAM user' option is also visible, with the description: 'User within an account that performs daily tasks. [Learn more](#)'. Below the user selection, the 'Root user email address' field is populated with 'deepak@k21academy.com'. A blue 'Next' button is at the bottom. At the very bottom, there is a disclaimer: 'By continuing, you agree to the [AWS Customer Agreement](#) or other agreement for AWS services, and the [Privacy Notice](#). This site uses essential cookies. See our [Cookie Notice](#) for more information.'

3. Once you have signed in to your AWS account, your console home will look like this:

- On the navigation bar in the upper-right corner, choose your account name (or alias), and then choose Account.

- On the Account Settings page, scroll to the end of the page to the Close Account section. Read and ensure that you understand the text next to the check boxes.
After you close an AWS account, you can no longer use it to access AWS services.

6. Select the check boxes to accept the terms, and then choose Close Account.

Amazon Devices

Your Amazon device(s), such as Echo, Tablets, E-Readers, Fire TV etc., will no longer be registered to your Amazon account, and you will no longer have access to Amazon services on your device(s) unless you register the device to another active account. Information stored in Amazon applications on Fire tablets, such as saved contacts or calendar events, bookmarks in the Maps app, and any device backups. You can download your contacts or calendar events using in-app download functionalities.

Alexa, the Alexa app and services available through Alexa (e.g., skills, alarms, lists, etc.) on your Alexa-enabled devices. Your voice recordings along with other Alexa content and data.

- ☐ I'm not using this account anymore
- ☐ I have another account
- ☐ I want to create a new account
- ☐ Account security concerns/Unauthorized activity
- ☐ Privacy concerns
- ☐ I have open issues with Amazon
- ☐ I don't want to provide a reason

☐ Yes, I want to permanently close my Amazon Account and delete my data.

Close My Account

Please be advised that Amazon is legally required or entitled to retain some types of data, such as order history. We do this in line with applicable laws including for tax and accounting and fraud prevention purposes.

7. In the confirmation box, choose Close Account.

⚠ Account Closure Is A Permanent Action

Please note account closure is a permanent action and once your account is closed it will no longer be available to you and cannot be restored. If you decide later that you want to start ordering from us again, or if you would like to use products and services that require an account, you will need to create a new account.

Please confirm your decision for closing your Amazon account (Optional)

☒ Yes, I want to permanently close my Amazon Account and delete my data.

Close My Account

Thus, your AWS Account has been successfully deleted.

7 SHARE YOUR LEARNINGS

In this section, you are going to share whatever you learned during this lab on LinkedIn and WhatsApp.

As you know, building a strong professional profile is essential in today's job market. One way to showcase your skills and knowledge is by sharing your labs and projects on LinkedIn.

Your LinkedIn profile is a powerful tool in your job search. Sharing your labs and projects is just one way to demonstrate your expertise and stand out to potential employers. If you don't have LinkedIn, we strongly recommend you create one for yourself.

By doing so, you can demonstrate to potential employers or connections that you have hands-on experience in your field and are actively engaged in learning and growing your skills.

7.1 On LinkedIn

Take a screenshot of the lab and share it on your LinkedIn. So, this will attract recruiters and employers to your profile and increase reach. Do remember to tag **K21Academy**, as we will circulate in our network too, to increase your reach.

Please refer the following examples on how to share on LinkedIn (don't limit yourself to just these types). Share learnings in points, notes  or anything that can help others.

Here is a sample that includes steps inside a post followed by a screenshot:

Hi There,

Today I have Provisioned an SSL/TLS Certificates using AWS Certificate Manager. It was fun and learned a lot of services integrated in the deployment.

To do this deployment I had to gone through the following steps:

1. Created an S3 bucket and enabled Static Website Hosting
2. Created a Hosted Zone and Mapped DNS Using Route53
3. Requested SSL/TLS certificates using AWS Certificate Manager
4. And finally, Configured CloudFront Distribution

Thanks, [K21Academy: Learn Cloud From Experts](#) For providing me with the required resources. #aws #awscloud #awsservices #learning #cloud #cloud #project #learning

Hi There,

Today I have deployed an awesome tool to monitor an entire K8s cluster. It was fun and learned a lot diring the deployment.

To do this deployment I had to gone through the following steps:

1. Created an multinode K8s cluster.
2. Created a namespace named "monitoring".
3. Created clusterRole & clusterRole Binding for Prometheus.
4. Created the ConfigMap encluing all the necessary Data for deploying Prometheus
5. Created a Deployment file for Prometheus
6. Finally I ran all the files and wallah.. Its done.

Thanks, [K21Academy: Learn Cloud From Experts](#) For providing me with the required resources. #kubernetes #k8s #devops #learning #cloud #cloud #project #learning #prometheus #monitoring

8 TROUBLESHOOTING

In this section we will be adding the commonly occurred errors while performing the lab.

8.1 OTP not Received on your Mobile

8.1.1 ERROR

While creating an AWS Account if didn't receive an SMS or call to complete the identity verification process.

8.1.2 CAUSE

There might be some error from the backend of the AWS, Server might be busy at that time or you might have entered the wrong number. Also there might be possibility that country is not supported by AWS.

8.1.3 FIX

There are several fixes to this issue:

1. You've entered your telephone number and selected your country code correctly during the sign-up process.
 2. If you're using a mobile phone, be sure that you have a cellular signal to receive SMS messages or calls.
 3. The information that you entered for your payment method is correct.
 4. Open the AWS Support console, and then choose Create case.
- Choose Account and billing support.
 - For Type, select Account.
 - For Category, select Activation.
 - In the Case description section, provide a date and time when you can be reached.
 - In the Contact options section, select Chat for Contact methods.
 - Choose Submit.

8.2 Account is on Hold

8.2.1 ERROR

AWS Account is on Hold

8.2.2 CAUSE

There can be several reasons why an AWS account is put on hold. Some common causes include:

1. **Payment Issues:** If there are problems with the payment method linked to the AWS account, such as an expired credit card or insufficient funds, AWS may place the account on hold.
2. **Verification Required:** AWS might require additional verification of account ownership or billing information, and until the verification is completed, the account remains on hold.
3. **Security Concerns:** In some cases, AWS might detect suspicious activities or security issues associated with the account, prompting them to put it on hold for investigation.

8.2.3 FIX

To resolve the "AWS account on hold" issue, follow these steps:

1. **Check Payment Method:** Verify the payment method associated with the AWS account and ensure it is valid and has sufficient funds. Update the payment details if necessary.
2. **Contact AWS Support:** If AWS requires additional verification or security checks, contact AWS support through the AWS Management Console or by raising a support ticket. They will guide you through the verification process.
3. **Provide Documentation:** If AWS requests documentation or identity verification, provide the necessary documents as per their instructions.
4. **Check for Email Notifications:** Check your registered email for any communication from AWS regarding the account hold. They may have sent specific instructions or requests for action.
5. **Contact AWS Billing Support:** If you believe there is a billing issue or a misunderstanding, reach out to AWS Billing Support for clarification and resolution.

Keep in mind that the specific steps to resolve the issue may vary depending on the cause of the account hold. It is essential to address the root cause promptly and follow AWS instructions to lift the hold and regain access to your AWS resources.

Note: You can find all the details in your email.

9 SUMMARY

In this Activity Guide we have learned the how to create **AWS Free Tier Account**, **Verify the Account** and How-to login to **AWS Console**.

K21Academy
